

Foreman - Bug #32874

Host group operating system media is not properly inherited from parent

06/24/2021 08:54 AM - Ondřej Ezr

<b>Status:</b>	New	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Host groups	
<b>Target version:</b>		
<b>Difficulty:</b>		<b>Fixed in Releases:</b>
<b>Triaged:</b>	No	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	1957648	<b>Red Hat JIRA:</b>
<b>Pull request:</b>		
<b>Description</b> Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1957648">https://bugzilla.redhat.com/show_bug.cgi?id=1957648</a>  <b>Description of problem:</b> With respect to, <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1619257">https://bugzilla.redhat.com/show_bug.cgi?id=1619257</a> , this is the same issue hit by many customers again.  However, if we are not able to change the media type of select media, the correct media gets selected. But this is not the desired way.  If I change the operating system version of a parent group from let's say Redhat 8.2 to 8.3 all of the child groups become broken, to fix the issue I have to open up every single child group just to press "submit" to save them. Version-Release number of selected components (if applicable).
