Revision 9ad14f5d - 07/08/2021 12:01 PM - William Clark

Fixes #32891 - Support new tasking system and enable it by default

This introduces a new parameter `use_rq_tasking_system` with default value false that configures pulpcore to use the same RQ worker tasking system as before. When false, it instead configures pulpcore to use the newer PostgreSQL tasking system introduced in pulpcore version 3.14. Acceptance tests are included to ensure users can switch between either worker type.
