#### Description

Steps to reproduce

- 1) set a non ascii character in network or vnic description on oVirt for example german umlauts (ä,ü,ö etc.)
- 2) try to edit a host from hostview that is associates with oVirt or try to provision a new host on the affected oVirt cluster.

This leads to the following error: "Oops, we're sorry but something went wrong "\xC3" from ASCII-8BIT to UTF-8". It is impossible to edit hosts in this situation or provision any vm on oVirt.

It worked fine on 2.3.5 and below.
