Description		
<p>To debug issues with Pulp 3, it is important to set the log level to DEBUG. This can be achieved by putting "LOGGING = {"dynaconf_merge": True, "loggers": {"": {"handlers": ['console'], 'level': 'DEBUG'}}}" in "/etc/pulp/settings.py".</p> <p>It would be much easier if that line was already there with the default log-level.</p>

- *Target version set to 2.5.2*
- *Fixed in Releases 2.5.2 added*

The installer side was cherry picked to 2.5.2, I'm not sure if the hammer side was. However, this is the installer changelog so I'm setting that as the Fixed in version.
