#### Description

Cloned from [https://bugzilla.redhat.com/show\\_bug.cgi?id=1984965](https://bugzilla.redhat.com/show_bug.cgi?id=1984965)

#### Description of problem:

SSIA

#### Version-Release number of selected component (if applicable):

sat 6.10 snap 10

#### How reproducible:

Always

#### Steps to Reproduce:

1. Configure -> Environments -> help button
2. when you look at the top of the page, there is a breadcrumb navigation but it shows Lifecycle Environments
3. When you click on breadcrumb Lifecycle Environments link you are moved to Puppet Environments (which is correct and expected)

#### Actual results:

Button is called Lifecycle Environments

#### Expected results:

It's for puppet environment. It should be called Puppet Environments or Environments (I think Environments is now deprecated at least in api calls and hammer )

#### Additional info:

This problem is not occurring in 6.9.4  
So it's regression.
