Pull request: https://github.com/Katello/runcible/pull/221	
Description	
Cloned from bugzilla 1931501	
Description of problem:	
<code>/var/log/foreman/dynflow_executor.output</code> gets flooded with the following error messages:	
<code>/opt/theforeman/tfm/root/usr/share/gems/gems/runcible-2.13.0/lib/runcible/response.rb:10: warning: respond_to? is defined here</code>	
<code>/opt/theforeman/tfm/root/usr/share/gems/gems/runcible-2.13.0/lib/runcible/extensions/consumer.rb:17: warning: Runcible::Response#respond_to?(:to_ary) uses the deprecated method signature, which takes one parameter</code>	
The amount of data and repeated error messages are so that are overloading the filesystem.	
Version-Release number of selected component (if applicable): tfm-rubygem-runcible-2.13.0-2.el7sat.noarch
