Description

I had a host (created only recently) that I tried to build again by clicking 'Build'. The dialog popped up saying it would overwrite everything and a progress 'circle' turned. Then the circle disappeared but no buttons appeared. Found this in the logs.

That gave me the hint the BMC interface might be the issue. So I removed that interface and then Build worked.

This also happens on the BMC tab on the host:

The screenshot shows a 'Details' view for a host. At the top, there are tabs for 'Audits', 'Facts', 'Reports', and 'YAML'. Below these are tabs for 'Properties', 'Metrics', 'Templates', 'BMC' (which is highlighted in blue), and 'NICs'. A sub-section titled 'Initial configuration' is visible. A prominent red-bordered box contains an error message: 'Oops, we're sorry but something went wrong undefined method `bmc' for nil:NilClass'. A 'Back' button is located at the bottom left of this error box.

If you feel this is an error with Foreman itself,
please open a new issue with [Foreman ticketing system](#). Please include in your report the full error log that can be acquired by running: **foreman-rake errors:fetch_log request_id=9e599481** and it is highly recommended to also attach the foreman-debug output.
