Pull request:	https://github.com/theforeman/foreman/pull/8773		

Description

In settings, there is a "OAuth map users" where explanation says "Foreman will map users by username in request-header. If this is set to false, OAuth requests will have admin rights."

The problem is, that the settings has options "Yes" and "No". This can be confusing for users.

I found that during fixing of [#33439](#).

Fixes #33440 - improve description for "Oauth map users" setting

This setting has "Yes" and "No" options in UI so description should not use true/false.
