Difficulty:		Fixed in Releases: 3.4.0
Triaged:	No	Found in Releases: 2.3.5
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/foreman/foreman/pull/8795	
Description		
<p>Snippet <code>redhat_register`</code> try to install subscription-manager (at about line 115).</p> <p>On an air-gapped infrastructure, that causes a timeout trying reach an unreachable internet repo.</p> <p>It slows down the kickstart then if subscription-manager has not been installed before, I guess some part of the kickstart will failed.</p> <p>I do install subscription-manager in the custom snippet of section %packages because I think it's the only place I can do that.</p> <p>Then it would be nice to speed-up an air gapped kickstart by avoiding to wait for an inevitable timeout.</p>
