Description

On a fresh install of 3.0.0 with the foreman_puppet 1.0.1 plugin enabled, attempting to nest a hostgroup generates an error. Also, the rendering or visibility within the UI of classes linked with the parent of a parent do not show on the child hostgroup.

Actions:
- Create a hostgroup
- Click Nest in the UI
- The following stacktrace is seen.

We're unsure if this is related to the classes linked with the parent not showing on the child hostgroup or hosts (from either's edit page.)

I found this was fixed in nightly; and due to this being a plugin it should have been in that project.
