Is this going to make 4.4.0? Should we move to 4.5.0?

It's on our current sprint so it'll be close. But Foreman 3.3 will break Katello if it isn't done.

I've come up with <https://github.com/theforeman/foreman/pull/9150>

That gives Katello time until foreman 3.4 if we whitelist that deprecation warning.

But I believe it is not hard to update settings to use DSL, so if we can hit Foreman 3.3 release with this, it would be lovely
