Pull request: https://github.com/foreman/foreman/pull/8811	
Description	
<p>StrictMode is a tool for highlighting potential problems in an application. Like Fragment, StrictMode does not render any visible UI. It activates additional checks and warnings for its descendants.</p> <p>Note: Strict mode checks are run in development mode only; they do not impact the production build.</p> <p>StrictMode currently helps with:</p> <ul style="list-style-type: none">Identifying components with unsafe lifecyclesWarning about legacy string ref API usageWarning about deprecated findDOMNode usageDetecting unexpected side effectsDetecting legacy context API
