Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1978337
Description of problem:
"Host Configuration status for Ansible" widget on the WebUI returns zero for all options mentioned in the widget instead of returning the correct number of hosts. The value does not change at all.

Version-Release number of selected component (if applicable):

How reproducible:
100%

Actual results:
The widget returns value as zero for all hosts. It does not matter if the ansible command/playbook was successfully executed or failed.

Expected results:
Should return the correct number of hosts

Additional info:
The same behavior observed in Satellite 6.8

History
