

## Foreman - Bug #3391

### Unable to spoof templates as non-admin

10/21/2013 04:18 PM - Max San

<b>Status:</b> Duplicate	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Users, Roles and Permissions	
<b>Target version:</b>	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
In Foreman 1.3.0 it is not possible to spoof templates as non-admin users. It will just show a standard "We're sorry, but something went wrong." error message and throw exception in the log. Even with all ACL turned on the template will not be visible but as soon as you assign the user admin access the template can be spoofed. Log file attached.

Is duplicate of Foreman - Bug #2892: unattended spoof mode only work for an a...	<b>Resolved</b> <b>08/07/2013</b>

#### History

##### #1 - 10/21/2013 04:23 PM - Dominic Cleal

- Category set to Users, Roles and Permissions

##### #2 - 10/22/2013 08:22 AM - Lukas Zapletal

Reproduced.

##### #3 - 10/22/2013 09:11 AM - Lukas Zapletal

Hmmm I am not sure why we call authorize method even when it is not supposed to be called:

```
FILTERS.each do |f|
  define_method("#{f}_with_unattended") do
    send("#{f}_without_unattended") if params.keys.include?("spoof")
  end
  alias_method_chain f, :unattended
end
```

##### #4 - 11/01/2013 10:47 AM - Dominic Cleal

- Is duplicate of Bug #2892: unattended spoof mode only work for an administrator added

##### #5 - 11/01/2013 10:47 AM - Dominic Cleal

- Status changed from New to Duplicate
