Actions TODO

(see: http://entitlement.etherpad.corp.redhat.com/hammerBacklog)

- **update** WIP
  - repo enable/disable for redhat repos
  - add params for custom repos
  - add org & product-id params for determining repo uniqueness
- **create** WIP

Actions DONE

Other considerations

- the closely-related concept of repository_sets not yet addressed. See /katello/providers/redhat_provider#!=
- more actions likely to be added to this list.
- many v2 actions may be complete or at least partially complete.
- product id, organization id, and repo id will all need to be changed to strings in the params, since the API requires that these refer to their respective labels.
