<b>Description</b>	
<p>This logic was broken by the python3-pulpcore packages for EL7 and EL8 being renamed: <a href="https://github.com/theforeman/pulpcore-packaging/blob/rpm/3.16/packages/pulpcore-selinux/pulpcore-selinux.spec#L63">https://github.com/theforeman/pulpcore-packaging/blob/rpm/3.16/packages/pulpcore-selinux/pulpcore-selinux.spec#L63</a></p> <pre>... /sbin/fixfiles -R python3-pulpcore restore    : ...</pre> <p>This produces an error (with return code 0) during pulpcore-selinux being installed/upgraded, and it probably leaves files on disk with incorrect labels.</p> <pre>... yum yum install tfm-pulpcore-python3-pulpcore pulpcore-selinux ... Installing : pulpcore-selinux-1.2.6-2.el7.x86_64                73/73 python3-pulpcore not found ... ...</pre> <p>[root@centos-7 /]# /sbin/fixfiles -R python3-pulpcore restore Warning: Skipping the following R/O filesystems: /sys /sys/fs/cgroup python3-pulpcore not found [root@centos-7 /]# echo \$? 0 ...</p>
