

Foreman - Bug #34650

redfish_verify_ssl option has no effect

03/19/2022 06:26 PM - Peter Upton

Pull request:		
Description When using redfish for BMC control, certificates will always be validated regardless of the `redfish_verify_ssl` option. if I comment out line 6 from `/usr/share/foreman-proxy/modules/bmc/bmc_plugin.rb`, the value specified in `bmc.yml` is respected. That line reads: <pre>validate :redfish_verify_ssl, :boolean => true</pre> As I understand it, most redfish users do not have valid certs on their BMCs. This issue effects most users of redfish.
