

Foreman - Bug #3475

When Foreman URL (/users/login) is used as ErrorDocument target, status is not preserved

10/23/2013 06:50 AM - Jan Pazdziora

Status:	Closed	Fixed in Releases: Found in Releases: Red Hat JIRA:
Priority:	Normal	
Assignee:	Jan Pazdziora	
Category:	Authentication	
Target version:	1.4.2	
Difficulty:		
Triaged:		
Bugzilla link:		
Pull request:	https://github.com/theforeman/foreman/pull/2401	
Description		
<p>In the document http://projects.theforeman.org/projects/foreman/wiki/Foreman_and_mod_auth_kerb, configuration is shown which allows to configure mod_auth_kerb for Negotiate authentication for issue http://projects.theforeman.org/issues/3312.</p> <p>However, the fallback configuration that I found working is a little bit cumbersome:</p> <pre>ErrorDocument 401 '<html><meta http-equiv="refresh" content="0; URL=/users/login"><body>Kerberos authentication did not pass.</body></html>'</pre> <p>It would be much better if we could use</p> <pre>ErrorDocument 401 /users/login</pre> <p>However, when the /users/login is served by Foreman's passenger, it does not preserve the 401 status, returning 200 instead. As a result, the Negotiation does not happen at all (and situation is the same when Basic authentication is configured). So that setup cannot be used.</p> <p>Foreman shouldn't specify status (and force 200) if there already is one set in the response.</p>
