Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>Today, when Katello is installed/configured, it is deployed with a bootstrap RPM that facilitates consumers registering to Katello. Details on using the bootstrap RPM can be found at: https://fedorahosted.org/katello/wiki/GuideSystemRegistrationClient#Option1preferredmethod:UsingthebootstrapRPM .</p> <p>Once Katello is installed as an engine, we need to ensure that this capability is still supported.</p>
