<b>Description</b>		
Hello ,		
I have added "Datacenter" plugin in foreman by referring link : <a href="https://github.com/theforeman/foreman_datacenter">https://github.com/theforeman/foreman_datacenter</a> .		
The installation was successful, also able to see all option regarding "Datacenter" plugin but when I try to create "Rack" & "Devices" it shows below error.		
<b>Rack Error : Oops, we're sorry but something went wrong undefined method `correct_position' for #&lt;ForemanDatacenter::Rack:0x0000000014093238&gt;</b>		
<b>Devices Error : Oops, we're sorry but something went wrong undefined method `&gt;' for nil:NilClass</b>		
Also attached error images files
