Pull request:			

Description

Allow setting a maximum number of (archived?) versions allowed. Once the number of versions crosses the provided number, autodelete older versions.

This will help to keep instances lean where users have automated publishes on CVs and end up with large number of unused versions for a CV.

Keep in mind composite CVs when implementing this cause versions in use in CCVs can't be removed.

History

#1 - 07/06/2022 05:40 PM - Lucy Fu

- Target version set to Katello Backlog

- Triaged changed from No to Yes
