#### Description

Foreman: develop  
Libvirt: 7.6.0  
OS: Fedora 35  
qemu-kvm: 6.1.0 (qemu-6.1.0-15.fc35)

#### Steps to reproduce

- Try to create host with libvirt CR

#### Error:

it's working for me - on 7.6 (and it looks like 8 - but 8 it broken due to vnc password, but it does look like it provisions the network ok)

I suspect this is a support request to debug it around the specific interface you're using
