Description

After merging of PR#9267 [0] some integration tests are failing because of empty search bar input value (missing "name = hostname").

How to reproduce (on develop)

```
rm -rf tmp/*;
bundle exec rails webpack:compile
bundle exec spring stop

DEBUG_JS_TEST=1 bundle exec rails test test/integration/fact_value_js_test.rb test/integration/config_report_js_test.rb
```

If you checkout 877eb77 [1] commit and repeat steps above, everything works as expected.

Notes

- It's not working ONLY in the integration tests, latest Firefox and Chrome works without any problems
- Downgrading chromedriver from 102 to 93 didn't do anything
