Pull request:	https://github.com/theforeman/foreman/pull/9310			

Description

While Foreman doesn't depend on Faraday directly, it is pulled in via fog-google which depends on google-cloud-env, googleauth and signet which all pull in Faraday. This is not a bad thing, but our ecosystem is largely incompatible with Faraday 2.x. To make packaging easier, pinning to 1.x works around this.

Fixes #35244 - Pin Faraday to 1.x

While Foreman doesn't depend on Faraday directly, it is pulled in via
fog-google which depends on google-cloud-env, googleauth and signet
which all pull in Faraday. This is not a bad thing, but our ecosystem is
largely incompatible with Faraday 2.x. Pinning to 1.x makes packaging
easier.
