Revision 28abc66d - 01/02/2014 09:24 PM - Walden Raines

Fix less parse error by removing bastion stylesheets from assets, fixes #3536

The issue here was that the less parser was trying to import the bootstrap scss in foreman and was obviously unable to parse it because it was less instead of scss.

Revision 038f168f - 01/03/2014 10:01 AM - Thomas McKay

Merge pull request #3538 from waldenraines/fix-assets

Fix less parse error by removing bastion stylesheets from assets, fixes #3536

History

#1 - 10/29/2013 12:35 PM - Dominic Cleal

- Category changed from Host creation to Compute resources
- Status changed from New to Rejected
- Priority changed from High to Normal
- Difficulty deleted (medium)

The SQL statement on the "Operation FAILED" line cannot have been generated by Foreman, but instead by oVirt. It references a missing column, presumably in oVirt's own database. Please contact the oVirt project for support, or to raise a bug there.

#2 - 10/29/2013 12:39 PM - Yama Kasi

Hi Dominic,

The question is who is following who it's specifications.

I thought that FM was on top of oVirt so if oVirt changes something, FM needs to follow.

#3 - 10/29/2013 12:46 PM - Dominic Cleal

Foreman doesn't interact with oVirt's database, but the error states that a table column is missing. It seems unlikely that Foreman or the libraries we use could cause this class of error - it's likely to be internal to the application.

#4 - 10/29/2013 12:50 PM - Yama Kasi

But it seems that FM wants to get something from that table using ?? the api ??

As it has worked before and oVirt can change things internal I think FM has to change their things too...

I know it sounds nitpicking but that is how integration goes it seems.

#5 - 10/29/2013 12:55 PM - Dominic Cleal

Foreman doesn't access the table directly, so it should not be able to cause this class of error. I think you'll have better luck raising it with the oVirt project first, as it appears to be an error from there.

#6 - 10/29/2013 01:43 PM - Dominic Cleal

- Status changed from Rejected to New

As discussed on IRC, reopening, but I still have my reservations about the cause.

#7 - 10/29/2013 02:25 PM - Ohad Levy

see workaround to the problem at <https://github.com/abenari/rbovirt/pull/27>

#8 - 10/29/2013 03:06 PM - Yama Kasi

Hi Ohad,

I have changed both files on my Ubuntu installation but it didn't fix the issue yet, these are the files:

```
/usr/share/foreman/vendor/ruby/1.8/gems/rbovirt-0.0.20/lib/ovirt/volume.rb  
/usr/share/foreman/vendor/ruby/1.8/gems/rbovirt-0.0.21/lib/ovirt/volume.rb
```

Thanks so far!

Cheers,
Matt

Thanks so far!

It turns out its a workaround for another ovirt issue, not related to this one.

do we have an ovirt bug for this trace too?

#10 - 10/30/2013 02:30 PM - Ohad Levy

as this looks like an ovirt trace and not a foreman trace...

#11 - 10/30/2013 02:32 PM - Ohad Levy

#12 - 10/30/2013 02:34 PM - Yama Kasi

The logs indeed exists in de engine log of oVirt, but no issues on oVirt so far.

I cannot find any issues @ the API too.
