Description <p>I am using Libvirt compute resources plugin on Foreman, when I click "Console" on each VM, I see "The connection was closed by the browser. please verify that the certificate authority is valid"; So I disabled the websocket encryption, problem still the same so I turned on debug mode, I got this error from firefox,</p> <pre>ws://host1.internal:5914</pre> <p>Error message: NS_ERROR_DOM_BAD_URI</p>
