From <a href="https://community.theforeman.org/t/foreman-image-provisioning/30777">https://community.theforeman.org/t/foreman-image-provisioning/30777</a>	
<b>Problem:</b> Getting 'Call to virStorageVolCreateXML failed: XML error: malformed owner element' when trying to deploy a new Libvirt Vm. It looks like it's not happy about storage. Could be the sam bug as this 894667 – XML error: malformed owner element but not sure if been fixed yet or is their a workaround.	
<b>Expected outcome:</b> Image to be created	
<b>Foreman and Proxy versions:</b> Foreman 3.4.0	
<b>Foreman and Proxy plugin versions:</b> Foreman 3.4.0
