Foreman - Feature #35726

Bug # 35585 (Closed): Unable to enable callback plugin per-template

Add pagelet mountpoints to form template to make it extensible in plugins

Pull request:	https://github.com/theforeman/foreman/pull/9503			

Description

We need to add the `ansible_callback_enabled` property to the template's params, so we can set it from the UI.
And we need to add a mount point in the template's form, so we can use it on the Pagelet created in `foreman_ansible` plugin.

Revision d6e20fd7 - 01/04/2023 10:27 AM - Nofar Alfassi

Fixes #35726 - adding callback_enabled option to job templates for foreman_ansible

Added the `ansible_callback_enabled` property to the template's params, so we can set it from the UI.
And added a new mount point in the template's form, for the Pagelet created in `foreman_ansible` plugin.
