Foreman - Feature #35731

support puppetlabs yumrepo setup on EL9

11/08/2022 12:26 AM - Joshua Hoblitt

Target version:			
Difficulty:		**Fixed in Releases:**	
Triaged:	No	**Found in Releases:**	Nightly
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/9505		

Description

The http://yum.puppet.com/puppet7 directory does not contain an rpm for
EL9. In other words, this URL constructed using the current logic is a
404:

https://yum.puppet.com/puppet7/puppet7-release-el-9.noarch.rpm

There are packages for EL5 through EL9 in the root of the repo. E.g.:

http://yum.puppet.com/puppet7-release-el-9.noarch.rpm

This simple fix is to drop usage of a "puppet<ELX>" subdir for all major
EL versions.

It appears I duplicated work already on master and didn't notice as the patch was a perfect reverse diff. Please close out this issue.
