

Foreman - Bug #3575

Cannot update an Openstack CR if the Tenant has been removed

11/04/2013 05:42 PM - Greg Sutcliffe

Status: New	
Priority: Normal

Pull request:	
Description	
<p>If you remove the Tenant(project) that Foreman is connected to on the Openstack end, you cannot update the Foreman side - clicking Load Tenants results in:</p>	
<pre>Unable to save Expected([200, 204]) <=> Actual(401 Unauthorized) response => #&lt;Excon::Response:0x0000000b521a10 @data={:body=&gt;{"error": {"message": "Could not find project, test2.", "code": 401, "title": "Unauthorized"}}}</pre>	
<p>It seems we serialize the tenant choice and use forever after - we should probably clear that if the user/password has been changed, as the list of available tenants will now be different</p>
