| Description Actually, there is no documentation nor feature on gui to uninstall plugins. A Ticket is already open for listing plugins. Being able to uninstall and/or disable them would be handy to troubleshoot weird issues. (Ex. #3570) | |

- Related to Feature #3510: As a GUI user, I would like to know what plugins are installed added

#2 - 11/06/2013 09:20 AM - Benjamin Papillon

- Description updated

#3 - 11/06/2013 09:22 AM - Dominic Cleal

- Category changed from Web Interface to Plugin integration

We have talked about a Jenkins-style plugin manager where we might be able to add/remove plugins on the fly. Currently we're relying on the system package manager for RPMs and bundler otherwise, so it's a bit trickier.

This does hint at another looming issue, which is that some plugins should have an uninstallation/purge procedure which removes certain data from Foreman's database. As plugins get more advanced, it's likely that they leave things like STI data in tables or foreign keys that might interfere with running of the standalone Foreman app.

#4 - 11/06/2013 09:29 AM - Benjamin Papillon

This is calling for another ticket :D

Add guidelines to help plugin writers so that they plan and document an uninstall feature.

Shall I create it? ;-)

#5 - 11/06/2013 09:31 AM - Dominic Cleal

Sure, thanks! :)
