

Foreman - Feature #35916

Update kickstart_rhsm to allow registration to a satellite instance if katello is not installed.

01/10/2023 06:49 PM - Doug Forster

<div>Status:New</div> <div>Priority:Normal</div> <div>Assignee:</div> <div>Category:Templates</div> <div>Target version:</div> <div>Difficulty:</div> <div>Triaged:No</div> <div>Bugzilla link:</div> <div>Pull request:</div>	<div>Fixed in Releases:</div> <div>Found in Releases:</div> <div>Red Hat JIRA:</div>
<div>Description</div> <p>Previously with the redhat_register template I was able to pass in a subscription_manager_certpkg_url which configured subscription manager to use the satellite instance. It seems this should be configurable with the new commands as well.</p> <p>It seems we just need to make these configurable to something else if katello is not installed.</p> <pre>subman_hostname = "--server-hostname #{@host.content_source.rhsm_url.host}" if (plugin_present?('katello') && @host.content_source) subman_rhsm_baseurl = "--rhsm-baseurl #{@host.content_source.pulp_content_url}" if (plugin_present?('katello') && @host.content_source)</pre> <p>A side note is that the above rhsm commands are not documented in RedHat's documentation. https://access.redhat.com/documentation/en-us/red_hat_enterprise_linux/9/html/performing_an_advanced_rhel_9_installation/kickstart-commands-and-options-reference_installing-rhel-as-an-experienced-user#rhsm_kickstart-commands-for-installation-program-configuration-and-flow-control</p>
