Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/10420	
Description	
The Simple Publisher (= everything of the repo is part of component: all, Suite: default) has some bad limitations, like apt-pinning is not possible. Currently, simple and structured publisher are used in pulp_deb which is additionally a performance issue. We want to switch to structured publisher completely and get rid of the simple publisher.
