<b>Description</b>	
Hammer attempts to list the IP in the output of "hammer host list" but because the IP isn't in the RABL, the column is empty:	
<pre>\$ hammer host list</pre>	
<pre>--- ----- ----- ----- ----- -----  ID   NAME   OPERATING SYSTEM ID   HOST GROUP ID   IP   MAC --- ----- ----- ----- ----- -----  1   test4.elysium.emeraldreverie.org   1       --- ----- ----- ----- ----- </pre>	
We should either add this to the rabl or remove the column from Hammer.

I would like to add at least IP, as its such a common thing, and does not cost anything for fetching it.

we could also consider adding attributes, such as last\_compile/last\_report and type?

I'd think it should probably match the web UI columns?

I can't reproduce this, I assume there is a duplicate bug that has been closed but I haven't found it.
