

Installer - Bug #3610

--reset-db error detection does not work

11/08/2013 03:04 PM - Marek Hulán

Status: Closed	
Priority: Normal

Pull request:	
Description	
The problem is that rake db:drop returns 0 even when there are errors. We should detect whether anything was on STDOUT and in such case report a warning otherwise suppose it ran ok.

Revision 76518ecb - 11/14/2013 08:57 AM - Marek Hulán

Fixes #3610 - explains error detection problems

History

#1 - 11/12/2013 10:25 AM - Marek Hulán

- Project changed from Kafo to Installer
- Status changed from New to Assigned
- Assignee set to Marek Hulán

#2 - 11/12/2013 10:33 AM - Marek Hulán

This won't be that easy because there can be deprecation warnings on STDOUT (from fog atm) and STDERR can contain warnings like "program compiled against libxml 209 using older 208".

I think the only correct solution is to wait until this PR gets merged <https://github.com/rails/rails/pull/12531> which is targeted 4.1.0 (unless they backport it). Meanwhile we should document this somehow?

#3 - 11/12/2013 06:29 PM - Greg Sutcliffe

I think documentation is fine while we wait.

#4 - 11/14/2013 09:00 AM - Marek Hulán

- Status changed from Assigned to New

Explanation is now part of installer help - see <https://github.com/foreman/foreman-installer/pull/78>. Moving this to new status until rake db:drop returns meaningful error code.

#5 - 11/14/2013 09:52 AM - Marek Hulán

- Status changed from New to Closed
- % Done changed from 0 to 100
