Foreman - Bug #3612

Editing host after an compute associate ends in an oops

11/08/2013 08:08 PM - Werner Dijkerman

Pull request:			

Description

I've added an VMware "compute resources".
It has an valid connection and I see all VMs in Foreman which are present in vcenter. I've associated one host with an foreman host.

Now when I want to edit this server (from Hosts --> <server> --> Edit) I'll get an error:

```
undefined method `stringify_keys' for #<RbVmomi::VIM:0x007f592130a0d0>
```

Stacktrace:

```
NoMethodError
undefined method `stringify_keys' for #<RbVmomi::VIM:0x007f592130a0d0>

History

#1 - 11/08/2013 08:11 PM - Werner Dijkerman

It is with the 1.3 release and "foreman-vmware" is installed.

#2 - 11/11/2013 08:49 AM - Dominic Cleal

- Is duplicate of Bug #2680: Unable to provisioning host using UI - vSphere 4.1.0 added

#3 - 11/11/2013 08:49 AM - Dominic Cleal

- Status changed from New to Duplicate

Same issue as [#2680](#2680). I've just written a patch for this issue, linked from that bug report - would you mind trying it?

#4 - 11/11/2013 05:00 PM - Werner Dijkerman

- File weberror.log added

I've installed the file, but I've got error when opening a page in foreman. See attachement: weberror.log.
I've installed it as /usr/share/foreman/config/initializers/rbvmomi.rb and as
/opt/rh/ruby193/root/usr/share/gems/gems/railties-3.2.8/lib/rails/generators/rails/app/templates/config/initializers/rbvmomi.rb

It's a VMware 5.5.
My linux machine is CentOS 6.4 updated this evening with jum update (Foreman 1.3.1 is installed to)

#5 - 11/11/2013 05:05 PM - Dominic Cleal

The error log says "undefined method `reScue'" which suggests the case of the "s" character in the rbvmomi.rb file has been flipped from lower to upper case - can you check it's all lower?

#6 - 11/11/2013 05:31 PM - Werner Dijkerman

You are right, sorry!
It is working now, thanks!
