<b>Description</b>		
<p>When I wanted to debug a template I forgot to type <a href="https://github.com/theforeman/foreman/blob/3.3-stable/app/views/unattended/provisioning_templates/registration/global_registration.erb#L15">https://github.com/theforeman/foreman/blob/3.3-stable/app/views/unattended/provisioning_templates/registration/global_registration.erb#L15</a> (running each command step by step)</p> <p>And I got a issue that third word isn't the UUID <a href="https://github.com/theforeman/foreman/blob/9962f72c635838ced1da86a7e818e2c431c3853e/app/views/unattended/provisioning_templates/registration/global_registration.erb#L118">https://github.com/theforeman/foreman/blob/9962f72c635838ced1da86a7e818e2c431c3853e/app/views/unattended/provisioning_templates/registration/global_registration.erb#L118</a></p> <p>If we want to match a UUID we should match a UUID not something hazardous like third word. It will be more resistant to change of output.</p> <p>I don't have other example of stricter command might be needed but would happy to fix them.</p>
