

Foreman - Bug #36393

global registration should not create hosts as "managed" or "to be built"

05/15/2023 07:52 AM - Evgeni Golov

Status:	Closed	
Priority:	Normal	
Assignee:	Ewoud Kohl van Wijngaarden	
Category:	Host registration	
Target version:		
Difficulty:		Fixed in Releases: 3.6.2, 3.7.1, 3.8.0
Triaged:	Yes	Found in Releases:
Bugzilla link:	2212630	Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/9746 , https://github.com/theforeman/foreman/pull/9788 , https://github.com/theforeman/foreman/pull/9789	

Description

When the "original" implementation of "create a host via curl" was done in 57d95c1685f28e0a52bd40fc26dd66d24adc0288, the create_host_curl method contained "build": "false", "managed": "false" in the payload, as this is IMHO the correct thing to do (the host is already created, so build:false is obvious, managed:false also makes sense as we do not submit enough data to create a fully managed host).

this also matches the behaviour of bootstrap.py:

<https://github.com/Katello/katello-client-bootstrap/blob/master/bootstrap.py#L926>

<https://github.com/Katello/katello-client-bootstrap/blob/master/bootstrap.py#L936-L939>

Now when things were split up into "plain Foreman" and "Foreman with Katello" in 2110556a713d53d5f09f8af35016ee92f0403572, the Katello part is missing the build:false and managed:false entries

This means that every host registration in Katello now needs to flip the machine back to "it's built" state, costing precious time during registration.

Revision 7c412864 - 08/03/2023 09:50 AM - Leos Stejskal

Fixes #36393 - Do not rebuild managed hosts in registration

History

#1 - 05/15/2023 11:00 AM - Ewoud Kohl van Wijngaarden

This came up in <https://community.theforeman.org/t/benchmarking-katello-using-host-registration/33495> and it's also mentioned that besides costing precious time it could even cause host rebuilds which can lead to data loss.
