Description	
<p>I installed foreman 3.1 and would like to play with foreman_content plugin to manage my pulp server (i don't want all the features ok katello) but i get an error during the installation. I think that's a packaging problem.</p> <pre>[root@foreman root]# yum install ruby193-rubygem-foreman_content.noarch Loaded plugins: product-id, pulp-profile-update, subscription-manager This system is receiving updates from Red Hat Subscription Management. Setting up Install Process Resolving Dependencies --> Running transaction check --> Package ruby193-rubygem-foreman_content.noarch 0:0.4-1.el6 will be installed --> Processing Dependency: ruby193-rubygem(runcible) = 0.4.10 for package: ruby193-rubygem-foreman_content-0.4-1.el6.noarch --> Finished Dependency Resolution Error: Package: ruby193-rubygem-foreman_content-0.4-1.el6.noarch (foreman-plugins) Requires: ruby193-rubygem(runcible) = 0.4.10 Installed: ruby193-rubygem-runcible-1.0.7-1.el6.noarch (@katello) ruby193-rubygem(runcible) = 1.0.7 Available: ruby193-rubygem-runcible-0.4.10-1.el6.noarch (foreman-plugins) ruby193-rubygem(runcible) = 0.4.10 You could try using --skip-broken to work around the problem You could try running: rpm -Va --nofiles --nodigest</pre> <p>This are the packages installed from the official stable repository:</p> <pre>foreman-postgresql-1.3.1-1.el6.noarch foreman-1.3.1-1.el6.noarch foreman-installer-1.3.1-1.el6.noarch rubygem-foreman_api-0.1.6-1.el6.noarch ruby193-rubygem-foreman_api-0.1.6-1.el6.noarch ruby193-rubygem-foreman_bootdisk-1.2.3-2.el6.noarch ruby193-rubygem-runcible-1.0.7-1.el6.noarch foreman-vmware-1.3.1-1.el6.noarch foreman-compute-1.3.1-1.el6.noarch</pre> <p>Red Hat Enterprise Linux Server release 6.4 (Santiago) Arch: x86_64</p>

It looks like you have both the katello and our plugins repo installed, and the versions are conflicting. Try using --disablerepo=katello.

#2 - 11/14/2013 07:20 PM - **Angelo Lisco**

Yes, Dominic that's right! It was my fault...I'm sorry for the noise.

I installed and then removed katello+foreman and i didn't notice that the rubygem-runcible package wasn't removed when i uninstalled katello. So, I did a 'yum -y erase ruby193-rubygem-runcible && yum -y install ruby193-rubygem-foreman_content.noarch' and it installed correctly.

Do you think the plugin will work with pulp 2.3 beta (pulp-server-2.3.0-0.35.beta)?

I don't know, not sure what it was tested with. It's not being developed at the moment, as Katello is being redesigned to work as a plugin and will replace foreman_content (which was more of a PoC).
