

Foreman - Bug #36541

inconsistent configuration for Redis as used by Dynflow

06/28/2023 09:30 AM - Evgeni Golov

<div>Status:Closed</div> <div>Priority:Normal</div> <div>Assignee:</div> <div>Category:</div> <div>Target version:</div> <div>Difficulty:</div> <div>Triaged:No</div> <div>Bugzilla link:</div> <div>Pull request:</div>	<div>Fixed in Releases:3.9.0</div> <div>Found in Releases:3.7.0</div> <div>Red Hat JIRA:</div>
<div>Description</div> <div>Ohai,</div> <div>in <a href="https://github.com/theforeman/puppet-foreman/blob/1d09876d7838bcd133add6266f4ba19b936ccb6c/manifests/config.pp#L14">https://github.com/theforeman/puppet-foreman/blob/1d09876d7838bcd133add6266f4ba19b936ccb6c/manifests/config.pp#L14</a> we default to use localhost/6 as the Redis DB for Dynflow, which gets written to /etc/foreman/settings.yml in <a href="https://github.com/theforeman/puppet-foreman/blob/1d09876d7838bcd133add6266f4ba19b936ccb6c/templates/settings.yaml.erb#L97">https://github.com/theforeman/puppet-foreman/blob/1d09876d7838bcd133add6266f4ba19b936ccb6c/templates/settings.yaml.erb#L97</a></div> <div>however, the service itself is configured to use localhost/0 in <a href="https://github.com/theforeman/foreman/blob/539373dfa5d85149a9dddb6e73bb378a23e134cb/extras/systemd/dynflow-sidekiq%40.service#L14-L15">https://github.com/theforeman/foreman/blob/539373dfa5d85149a9dddb6e73bb378a23e134cb/extras/systemd/dynflow-sidekiq%40.service#L14-L15</a> as seen during service startup:</div> <div>Jun 28 09:02:00 katello.example.com dynflow-sidekiq@worker-hosts-queue-1[55989]: 2023-06-28T09:02:00.648Z pid=55989 tid=17vt INFO: Booting Sidekiq 6.3.1 with redis options {:url=&gt;"redis://localhos</div> <div>t:6379/0"}  I have no idea if those two must match, or they are two different/unrelated uses of Redis inside Dynflow. But it seems odd and I would expect to be able to configure it.</div>
