

Foreman - Bug #3656

api v2 environments update - unable to specify name

11/14/2013 10:16 PM - Thomas McKay

Status: Closed

Triaged: No	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Environments take just a single param, name. Updating the name to itself (eg. "env1" update to "env1") gives error indicating the name is already in use. Omitting this param indicates that the name param is required.	
Updating the name to itself should not be an error condition.
