

Katello - Bug #36599

A failed "Actions::Katello::Host::Hypervisors" task lacks identifying information

07/17/2023 08:10 PM - Chris Roberts

Status:	Closed	
Priority:	Normal	
Assignee:	Chris Roberts	
Category:	Subscriptions	
Target version:	Katello 4.11.0	
Difficulty:		Fixed in Releases: Katello 4.10.0
Triaged:	Yes	Found in Releases:
Bugzilla link:	2149288	Red Hat JIRA: SAT-14106
Pull request:	https://github.com/Katello/katello/pull/10654	
Description		
Description of problem:		
When a "Actions::Katello::Host::Hypervisors" task ends with error/warnings, it does not indicate any detail about what hypervisor caused the issue. With the patch attached to this RFE, the error message displays also the ID and hostname of the affected hypervisor. The customer finds this addition really useful to identify the root cause of the problem, and requests to implement it in future Red Hat Satellite releases.		
Actual results:		
original error message:		
~~		
hypervisors warning: "Validation failed: Name must not include periods; Name must not include periods"		
~~
