But if I commit the creation of this VM another time, Foreman will create a host inside itself, but not the VM on VSphere. This message will be shown in the VM tab in the host-object:

```

'esx-252.xxx.xx' wurde nicht unter 'VMware (VMWare)' gefunden

'esx-252.xxx.xx' konnte nicht gelöscht werden oder 'VMware (VMWare)' reagiert nicht.

#### History

##### #1 - 11/19/2013 10:09 AM - Dennis Benndorf

Today I saw an error message while creating this vm in the desktop-client of vsphere. Note that this one was translated by me freely:

```
An error on an ESX-Host occured while starting the virtual Maschine esx-252.*BLA*.de.
In the configuration file is no Operatingsystem mentioned. Select a guest operating system from the General page on the Options tab of Virtual Machine Settings.
```
