Description

[#36827](#) updated tokens returned during authentication to match OAuth2 specs required by docker. This involved changing the `expires_at` field to an `expires_in` field. We kept the former field to maintain compatibility with existing smart proxies during 4.11 upgrades. It should be removed in 4.13 or later.

Relevant code: `app/controllers/katello/api/registry/registry_proxies_controller.rb:160-163`

History

#1 - 11/08/2023 06:42 PM - Chris Roberts

- Triaged changed from No to Yes

#2 - 11/28/2023 04:09 PM - Ewoud Kohl van Wijngaarden

- Subject changed from Remove deprecated field from docker repo authentication tokens to Remove deprecated field from docker repo authentication tokens

#3 - 03/27/2024 06:04 PM - Jeremy Lenz

- Target version changed from Katello 4.12.0 to Katello 4.13.0
