Description	
<p>It appears the issue in #23909 was reintroduced at some point. This bug is again present in Foreman 3.5.3. It looks like the same underlying confusion of the "key" versus "id" field in fog_extensions/vsphere/server.rb is to blame. In that file, changing</p> <pre>vm_network = all_networks.detect { network nic_attrs['network'] && [network[:name], network[:id]] .compact.include?(nic_attrs['network']) }</pre> <p>to</p> <pre>vm_network = all_networks.detect { network nic_attrs['network'] && [network[:name], network[:key]] .compact.include?(nic_attrs['network']) }</pre> <p>resolves the problem. The symptoms & conditions of this error are identical to the previous ticket.</p>
