Pull request:			

Description

Currently we have to use _ids= methods to add/remove relationships. {
"id": 42,
"name": "CentOS",
"architecture_ids": [1,2]
}
This is what we want {
"id": 42,
"name": "CentOS",
"architectures": [{
"id": 1,
"name": "i386"
},   {
"id": 2,
"name": "x86_64"
}
]
}
