Foreman - Bug #3694

Extra interface without mac address is silently ignored

11/19/2013 05:15 PM - Ewoud Kohl van Wijngaarden

Description

Steps to reproduce:

- Create / edit a host
- Go to the network tab
- Add an additional interface
- Fill all fields but the mac address
- Save

Expected results:

An error that mac address is required.

Actual results:

It saves the host, but drops the extra interface.

On a related note, changing host puppet parameters has a similar bug that it can ignore invalid input and just drop all your changes I heard from a colleague, but haven't looked into it.
