Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/9952	
Description	
In order to easily execute the selenium tests it would be good to have the possibility to use selenium remote webdriver images	
...	
docker run -d -p 4444:4444 --shm-size="2g" selenium/standalone-chrome:119.0	
...	
This driver could then be accessed from vagrant or CI docker images by i.e. setting an environment variable SELENIUM_REMOTE_HOST=<ip>
