Description		
<p>Multiple users have been confused about why 'Synced Content' is disabled on the host create screen under Media Selection. (for example, https://community.theforeman.org/t/i-have-synced-the-oracle-linux-8-repos/36225/2?u=jeremylenz)</p> <p>In order to enable it, you must first select the content view and lifecycle environment that contains your synced kickstart repositories. I think a tooltip or something similar would alleviate a lot of the confusion.</p>
