Foreman - Bug #3703

hammer - can't place a host in the build mode.

Description

I was able to successfulyl connect via hammer. Listing hosts works fine.

hammer host update --name <hostname> --build true results in the following message:

```
Partition Table cant be blank unless a custom partition has been defined
```

Please note that while working with the webui - the host can be placed in "build" mode with no issues.

- translation missing: en.field_release deleted (1)

I suspect the web UI auto-selects the first available partition table.

#2 - 11/20/2013 02:57 PM - Ohad Levy

I've thought so too, but even after updating the host, build button in the ui works, and via the cli it breaks.
